

MINERAL WOOL PLUG SMART 965

USAGE:

Mineral wool plugs are designed to cover the installation holes previously cut into the mineral wool. They are used in conjunction with insulation anchors.

The metal cutter, labeled SMART 901, is intended for making holes in mineral wool insulation material. It features a fixed depth cutting collar, ensuring a snug fit for the mineral wool plugs in the cut hole.

Plug	Size (mm)	Thickness (mm)	Packaging (pc)
SMART 965	Ø65	17	100
