

EPS PLUG SMART 967s

USAGE:

Polystyrene plugs are intended for covering the installation holes previously cut into the EPS board. They are used in conjunction with insulation anchors.

The plastic cutter, designated SMART 900 is designed to make holes in expanded polystyrene insulation material. The cutter has a set cutting collar depth, ensuring a proper fit for the EPS plug in the cut hole.

Plug	Size (mm)	Thickness (mm)	Packaging (pc)
